Sameer Nagar

Software Development Engineer (SDE) | MSCS Graduate @ CSUF | Salesforce (5x) & Cloud | Apex · JS · Python · C++ | Agentforce, AI & LLMs

Fullerton, California, United States

Summary

Adaptable and results-driven Software Development Engineer (SDE) with over 3 years of experience in software design, development, and project execution.

As a Master's in Computer Science Graduate from California State University, Fullerton (Graduated May '26), my expertise focuses on AI, LLMs, Data Science, and cloud technologies.

I am 5x Salesforce Certified (including Administrator, Advanced Administrator, Platform Developer I & II, and Agentforce Specialist) with hands-on expertise in cloud-based solutions, custom development, CRM automation, and Agentforce consultancy for lead generation and business forecasting.

Programming Languages: Proficient in Python, JavaScript, Java, Apex, C, and C++, etc.

Cloud & Platforms: Extensive experience with the Salesforce Ecosystem and AWS.

Key Projects & Professional Impact: Developed production-grade enterprise backend systems, custom APIs, and automated workflows using Apex, LWC, and third-party integrations (Twilio, Slack). Built an end-to-end drift-resilient log anomaly detection workbench using PyTorch and Flask. Designed a constraint-aware, full-stack ethical workforce scheduling system using JavaScript, HTML, and CSS.

Known for fast learning, strong problem-solving, and the ability to thrive in collaborative, cross-functional environments. Passionate about building innovative, scalable solutions that drive impact.

Open to full-time roles in software engineering, Salesforce development, or data-driven product teams. OPT (STEM Extension eligible) and open to sponsorship.

Experience

California State University, Fullerton

10 months

Teaching Associate

August 2025 - May 2026 (10 months)

United States

As a Teaching Associate, I provided academic support to undergraduate/graduate students by facilitating discussions, clarifying complex concepts, and guiding them through assignments and projects. I collaborated with professors to deliver engaging lessons, graded coursework with attention to fairness and accuracy, and held office hours to mentor students one-on-one. This role strengthened my communication, leadership, and problem-solving skills while deepening my expertise in computer science.

Service Associate

August 2025 - May 2026 (10 months)

United States

Deliver customer service across campus retail operations by assisting students, faculty, and staff with purchases, returns, and inquiries. Process transactions accurately, manage point-of-sale systems, and support merchandising, stocking, and inventory control. Contribute to team efficiency by maintaining organized displays and ensuring compliance with store policies. Actively foster a welcoming and supportive environment, strengthening skills in communication, problem-solving, and teamwork.

Unthinkable Solutions

2 years 7 months

Jr. Associate Software Engineering

May 2022 - May 2024 (2 years 1 month)

Gurugram, Haryana, India

Software Development Engineer (Backend) with ~3 years of experience building scalable systems and cloud-based solutions, including extensive work on the Salesforce platform. Proficient in designing APIs, business logic, and automation using Apex, Lightning Web Components (LWC), Visualforce, Flows, and Process Builder. Experienced across Sales, Service, Health,

and Order Management domains, with integrations spanning Field Service Lightning, Twilio, and Slack. Strong background in data migration, access control, system integrations, and full SDLC execution. Known for driving cross-functional collaboration, mentoring peers, and delivering reliable, production-grade solutions.

Software Engineer Intern

November 2021 - May 2022 (7 months)

Gurugram, Haryana, India

Software Engineering Intern with hands-on experience building backend systems, automation pipelines, and data-driven solutions using Python and modern development tools. Contributed to real-world projects involving API development, data processing, and workflow automation. Gained exposure to machine learning and AI concepts, implementing basic models and data analysis pipelines. Worked with Power BI for dashboarding and business insights, and collaborated across teams to deliver end-to-end solutions. Developed a strong foundation in software engineering principles, problem-solving, and production-oriented development practices.

Education

California State University, Fullerton

Master of Science - MS, Computer Science · (August 2024 - May 2026)

Rajiv Gandhi Prodyogiki Vishwavidyalaya

Bachelor of Technology - BTech, Computer Science and Engineering · (August 2018 - August 2022)

Central Board of Secondary Education

High School Diploma, Mathematics and Computer Science · (July 2008 - August 2018)
